I'm a full stack developer with 3 years of experience. I'm a computer geek since I learned to code from a young age in various computer languages. Versatile, I master the different technical steps of the website or the web application creation starting from the understanding of the user's needs to the frontend and backend development and maintenance.

📁 Professional Experience

Full stack web developer, CNM

03.2021 – present
Tunis, Tunisia

- Key contributor to 80% of Angular and node js project development, demonstrating rapid skill growth and adherence to industry best practices.
